Booster shots of **Pfizer** and **Moderna** are now available for adults who meet certain criteria:

- Age 65 and older
- 18 and older who live in long-term care settings
- 18 and older who have underlying medical conditions
- 18 and older who work or live in high-risk settings (This includes educators and those working in the education field/environment)

Pfizer and Moderna booster shots can be given six months after the initial two-dose series was completed.

**J&J** COVID-19 vaccine booster can be given at least two months after the initial one-shot J&J vaccination for those 18 and older.

Pre-registration is required to secure your booster vaccine. Registration can be done by clicking here. Walk-in’s are welcome as long as supplies are available.

*Please Note: The FDA and CDC are allowing mixing and matching of COVID-19 boosters, meaning a booster shot does not have to be from the same manufacturer as the original vaccination series. Patients should check with their doctor before requesting their booster dose from a different manufacturer.*
