LEHIGHTON AREA HIGH SCHOOL

PROGRAM OF STUDIES
Career and College Exploration

2021-2022

TRIBE PRIDE
DISTRICT MISSION STATEMENT

Partnering with students, families, and community to provide opportunities for life-long success through academic excellence and individual growth in a safe and supportive environment.

HIGH SCHOOL VISION STATEMENT

To engage students in an appreciative pursuit of knowledge while entrusting them with responsibility and an inquisitive journey of self-improvement.

BELIEFS

We believe:

• Every student has the right to learn in a safe, supportive environment.
• All students, regardless of diverse backgrounds and needs are capable of learning and must be respected as individual learners given the ability to develop appropriate skills to maximize their potential.
• Learning is a life-long process that begins within the family and is encouraged through the partnership of all shareholders.
• High standards and expectations, incorporated with varied extra-curricular programs, provide for a well-rounded education.
• Excellence in education requires time, effort, effective communication, and cooperation by the educational community as well as the community at large.
• To make responsible career and life choices, all students must learn to communicate, collaborate, problem solve, develop higher level thinking skills and use technology efficiently.
• The development of a strong work ethic is necessary to enable student to become self-directed and life-long learners.
• Students learn best from highly qualified, caring and well-trained educators.
• Through a positive work environment and focused efforts, our employees will make strong contributions to the district’s operational success.
• The educational system must continuously re-examine its purpose, financial commitment, programs, curriculum, and direction in order for a democratic society to flourish.

NON-DISCRIMINATION POLICY

It is the policy of the Lehighton Area School District not to discriminate on the basis of race, color, sex, religion, national origin, age or non-related handicaps or disabilities in its educational programs, activities or employment practices as required by Title IX, Section 504 of the Rehabilitation Act of 1973, and other such statutes.

Inquiries regarding this policy should be directed to Mr. Jonathan Cleaver, Superintendent, Lehighton Area School District, 1000 Union Street, Lehighton, Pennsylvania 18235. Telephone: (610)377-4490.

A Message for both Students and Parents:

This Curriculum Guide has been prepared for the information of the parents and students attending Lehighton Area High School. The material in this guide describes all the courses we offer and explains who may elect the same. It also tells what credit will be received for satisfactorily completing each course.

Many jobs now in existence may well be non-existent five or ten years from now. Likewise, other careers that do not exist today will most certainly be available in the future. Therefore, the best advice the school can give to a student is for them to plan a program that will allow for change.

As educators, we are aware of the fact that many students do not know what they want to do after graduation, but still, they must make some realistic choices concerning their future while still in high school.

Students are challenged to aim high in their future plans, and yet be realistic in their choices. Their choices should be made on the basis of past achievement, personal interests and desires.

We wish to urge all students to seriously consider some form of post-high school education such as a career and technical program, 2 or 4-year college/university, certification program and the military. KEEP GOING....KEEP GROWING....CONTINUE YOUR EDUCATION.

As you try to decide which courses you would like to take next year you should have an honest discussion with your parents. Our guidance counselors are trained and experienced in helping students to select courses wisely, but you must be honest with them. Remember, your final choice of subjects must meet the approval of your parents, your counselor, and yourself.

Finally, we feel that we have a curriculum that is diverse enough to meet the individual needs of our entire student body, so please take the time to study this booklet closely so that you can take full advantage of our offering.

3
GUIDELINES FOR COURSE SELECTION

COURSE SELECTION PROCESS

The selection of courses is viewed as a commitment between the student and the high school. We will do everything possible to schedule students to the courses they have selected, but the master schedule construction may dictate alternate course selections. Students are expected to complete those courses they have selected.

Students who do not complete a course selection sheet will be assigned courses by his or her counselor.

To begin the course selection process, students should consider several key items:
- Graduation requirements-select those classes first
- Prerequisites: Courses or grades that must be earned before taking a specific class
- The recommended and required courses for your post-high school career and educational plans

The counselors will present the Program of Studies and course selection sheet to the students. Students will be required to have core subject teachers initial their course selection sheet signifying agreement with the next sequence of course work in that subject area. Students should review courses with parents/guardians and enter their course requests on the computer through Power School. Students will need their Power School log-in. If a student does not have access to a computer, he/she should contact the guidance office and a school computer or lap-top will be made available. Upon inputting the course requests, students should return their signed course selection sheet to the guidance department. Due dates for each task will be provided to the students at the program of studies presentation.

Administration will build a master schedule based on student need and course request totals. This entire process takes several months. The listing of a course does not guarantee that the course will be taught. In the event of insufficient registration and/or staffing or facilities limitations, the administration reserves the right to cancel any course or limit enrollment in the course.

Counselors will attempt to meet individually with students prior to the conclusion of the school year to review a tentative schedule for the next school year and make adjustments as warranted.

PREREQUISITES

Past experience shows that a certain minimum level of achievement is necessary in certain courses if a student hopes to achieve satisfactorily in the "next level" course.

Students will be placed in their appropriate level class based on prior academic performance, teacher/department recommendations and/or benchmark/standardized testing. In an attempt to continue to encourage and challenge students, prerequisites have been established.

Lehighton Area High School offers the following levels of courses:

Advanced Placement (AP) - Classes providing advanced learning and give students the opportunity to study and learn at the collegiate level. Curriculum and guidelines for AP designation are governed by College Board.

Honors (HN) - Classes offered for high-achieving students - covering additional topics or some topics in greater depth than in the College Prep course.

A student placed in honors level classes must maintain a final minimum grade of 83% to advance to the next honors level class. Any student who fails an honors level class will be placed into a college preparatory (CP)
level for that content.

Dual Enrollment - College classes offered at LAHS or on a college campus through an accredited college or university. College credits and high school credits are simultaneously earned upon successful completion of the course. Dual enrollment classes will have a special designation on student transcripts.

College Preparatory (CP) - Courses that students take to prepare them for the academic rigor of college.

A student placed in a college preparatory (CP) level high school class may move up to an honors level class the next academic year by earning a final grade of an 88% in the college preparatory class.

Applied (APD) - Courses for students who have difficulty in specific subject areas. Most of these classes are co-taught which enables a student to receive additional help in the subject matter with a small student teacher ratio.

Additional prerequisites are listed after many of the course descriptions.

**CALCULATION OF THE GRADE POINT AVERAGE (GPA)**

During the course of a school year, two different types of Grade Point Averages (GPA) can be calculated for each student. The first is known as the “simple” or “non-weighted” GPA, while the second type is “weighted.” The “simple” GPA is calculated four (4) times a year, at the end of each marking period, using the grades from that report period to determine who qualifies for our honors lists. This “simple” GPA is never used to determine class rank. The “weighted” GPA is calculated at the end of the first semester and again at the end of the school year. Final course grades are used in this calculation, and the quality points are based upon the level (AP, Honors, College Prep, or Applied) of the course. This GPA rewards those students who have selected the more difficult courses (and did well). It is the “weighted,” end-of-the-year GPA that is used to determine a student’s official class rank. **OF THE TWO, THE “WEIGHTED” GPA IS THE MOST IMPORTANT. IT IS ALSO CUMULATIVE.**

Dual Enrollment is never factored into grades for Honor Roll purposes, but will be included in final transcript.

Examples of GPA calculations can be find in the student handbook located at [www.lehighton.org](http://www.lehighton.org) under the high school tab-important documents.

**COURSE FEES - SAFETY & MATERIALS**

Because of the nature of specific courses offered at Lehighton Area High School, students will incur expenses above and beyond what is supplied by the school district. Some examples include, purchasing material for art/photography projects, construction or manufacturing supplies which will become their personal property upon completion; pay fees for advanced placement testing or PSAT testing. Any questions regarding material costs/fees may be directed to the classroom teacher.
CAREER PATHWAYS

Lehighton Area High School has implemented Career Pathways model to assist students in planning appropriate course options that will help them to reach their post-secondary goals based on their interests and skills. A pathway is a broad grouping of careers that share similar characteristics and whose employment requirements call for many common interests, strengths and competences. Choosing a career pathway will help students focus on a career area that matches their interests, help assist with setting goals and developing a comprehensive course plan for high school, and provide insight into future career options and how they relate to your academic plan. How does it work?

Step One: Career Awareness: In elementary school, students are exposed to a wide range of careers through guest speakers, videos, guidance lessons and field trips. Teachers, school counselors, and parents help students develop an awareness of the importance of a good work habits, educational achievement and character development.

Step Two: Career Exploration: In middle school, students are encouraged to explore their interests by completing interest inventories and gathering information about careers including working conditions, educational requirements and skills needed. Teachers, school counselors and parents motivate students to identify their abilities and skills and continue to support strong work habits and good decision making skills.

Step Three: Career Preparation: In high school, students, with the help of their parents and guidance counselors, will chose one of five clusters:

- Arts, Media & Communication
- Business, Finance, Technology & Entrepreneurship
- Health & Human Services
- Engineering, Science, Mathematics & Industrial Technology
- College Scholars

Step Four: Career Development: Based on the career goals chosen, students will be advised to continue preparing for their careers.

<table>
<thead>
<tr>
<th>Post-Secondary Goals</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Employment</td>
<td>On the job Training: Employer designed training established for the worker to gain the necessary work skills while getting paid on the job. Apprentice program: Apprentices are paid as they attend work and classes. Upon completion, the worker will gain journeyman status in the specific industry. Career Link: Local resource that provides training, employment or support services to job seekers.</td>
</tr>
<tr>
<td>Military</td>
<td>All branches of the military have skilled training. Student interested can meet with a recruiter to explore active duty, reserve duty or ROTC opportunities. Students may be able to use their GI Bill to help pay for college.</td>
</tr>
<tr>
<td>Education</td>
<td>Diploma/Certificate Programs: Short-term programs that last on average 6 months to 1 year that assist with acquiring specific skills in order to gain employment at an entry level job. These programs can be found at technical schools (CCTI Adult Education), community colleges or some four year colleges/universities. Associate’s Degree: These are 2 year degrees that enable students to gain entry level employment in a specific career. Programs are found at community colleges, trade schools or some four year colleges/universities. Bachelor’ Degree: These are typically four-year degrees with course work in general education and a declared major. Degrees are obtained in liberal arts colleges, private colleges, state colleges and universities. Graduate/Professional Degree Programs: Post graduate degrees required for certain professions in order to practice or be employed in that career such as law, medicine, Ph.D and other professional fields. On average, programs can be 1 to 5 years in length beyond a bachelor’s degree. Accelerated programs are available at select colleges/universities.</td>

COLLEGE SCHOLARS

Lehighton Area High School in partnership with Lehigh Carbon Community College is able to offer students entering the 11th grade the ability to earn their associates degree from LCCC while simultaneously earning their high school diploma. Eligible students must have a minimum of a 3.0 GPA, be advanced or proficient on all Keystone exams, have good attendance and discipline and successfully pass LCCC placement testing to be considered for the program. This is a two-year program that will start at the beginning of a student’s 11th grade year. An informational session for students, parents/guardians is typically held in February. If accepted, students will take all their courses through LCCC. Tuition, transportation, textbooks and any additional supplies or fees are the responsibility of the student.

FAILURE OF REQUIRED COURSES

If students have failed a course with a final average between a 60%-48%, one may attempt to pass this course by attending a summer/winter credit recovery class. If the final course average was below a 48%, the course MUST BE REPEATED in a "regular" classroom during a "regular" school term.

Any core subject not taken through a winter/summer credit recovery class will need to be repeated during the traditional school year. Note some courses cannot be repeated during the traditional school year, requiring students to take the class through credit recovery and/or summer/winter school.

STUDENT COURSE LOAD

All students are required to carry a full schedule each school year. Students are required to attempt a minimum of 8 credits per year. This includes dual enrollment students and college scholars’ students.

NONBINDING NOTE

The school reserves the right to cancel or postpone courses for which insufficient enrollment, lack of physical facilities, or unavailability of professional personnel necessitates such action.

SCHEDULE CHANGES

Students will be able to review their schedule in PowerSchool on the first Monday of August. Students who need to make a change in their schedule should contact their respective counselor after the first Monday in August to schedule an appointment. A tremendous amount of time is spent in creating each student schedule to maximize educational opportunities. When necessary a counselor-student conference or parent/guardian contact will be made. Serious conflicts will be resolved by administration.

Changes to semester courses must be made within the first 5 days each semester. Changes to marking period based course must be made within the first 5 days of each semester.

If permission has been granted by administration for a student to drop a class after the 1st week of each semester due to extenuating circumstances, a "WP" or "WF" will be recorded on the student's permanent record. A WP and WF will only be considered under extenuating circumstances prior to the end of the 1st marking period of each semester. Students taking a WF will receive a 60% for the course which will be calculated into their GPA and class rank.

Since grades will be available 10 days after the last day of school, it will be the responsibility of the student who selected a course and who did not meet the suggested grade prerequisite to make another selection by contacting the guidance office by July 1st.
GRADUATION REQUIREMENTS

- All students must be advanced or proficient in Keystone content areas or complete an alternative assessment developed by LAHS/PDE.

- 26 credits as outlined below must be earned in order to graduate.

<table>
<thead>
<tr>

</tbody>
</table>

(*) The following areas will count towards this requirement: Art, Music, Band, Family & Consumer Sciences, Industrial Arts, Foreign Languages, plus any courses in English, Math, Science and Social Studies ABOVE graduation requirements.

“BE IT FURTHER RESOLVED, THAT upon failure to meet the required credit units for graduation, no student will be allowed to participate in the formal Commencement exercises.”

DUAL ENROLLMENT

In partnership with Lehigh Carbon Community College (LCCC), Lehighton School District is able to offer college level courses while students are still in high school. Students can choose to take classes on site at LCCC campus, on-line or at the high school when available. In most cases, students will earn three college credits/class and one honors level credit at LAHS. Students are responsible for the cost of the course, textbook and any travel that may be required.

This opportunity is open to all juniors and seniors. Students are responsible for completing a LCCC application and submitting tuition fees to the guidance office.

Students will adhere to all of the policies and procedures established by LCCC including fulfilling pre-requisites, grade requirements and placement testing determined by LCCC.

Students will work with their guidance counselor and parents/guardians to determine appropriate class enrollment.

A complete list of courses offered and course descriptions can be located on the Lehigh Carbon Community College website www.lccc.edu.
CARBON CAREER AND TECHNICAL INSTITUTE (CCTI)

CCTI is a comprehensive career and technical school offering both academic studies and career and technical studies in a full and half day format. The school serves students in grades 9, 10, 11 & 12. CCTI also offers FLEX scheduling for students who want to get a portion of a program to round out their high school curriculum and provide them with some skill or information in a particular trade.

**CCTI Technical Areas:**
- Auto body/ Collision & Repair Technology/Technician
- Auto Service & Technology
- Carpentry
- Computer Engineering Technology
- Cosmetology
- Culinary Arts
- Drafting and Design Technology/Technician
- Electrical Distribution and Automation/Electrician
- Electronics Communication Engineering Technology
- Graphic Design
- Health/ Medical Assistant/Aide
- Heating, Ventilation, Air Conditioning & Refrigeration
- Marketing/Distributive Education
- Precise Machine Technology
- Welding

Interested students need to complete and submit a CCTI application to the guidance office by the first Monday in March prior to the beginning of the new school year.

**NCAA CLEARING HOUSE**

Any student interested in playing athletics at a Division I or Division II college or university must register with the NCAA Clearing House. It is important that students choose college preparatory classes that have been approved by the NCAA Clearinghouse. Below is further information from the NCAA Clearinghouse website.

- At the beginning of your **junior year**, complete your online registration at [www.eligibilitycenter.org](http://www.eligibilitycenter.org).
- Register to take the ACT, SAT or both and use the NCAA Eligibility Center code “9999” as a score recipient. Doing this sends your official score directly to the NCAA Eligibility Center.
- Double check to make sure the courses you have taken match your school’s list of NCAA courses.
- Have your high school counselor send an official transcript to the NCAA Eligibility Center after completing your junior year. If you have attended more than one high school, the NCAA Eligibility Center will need official transcripts from all high schools attended.
- Before registering for classes for your **senior year**, check with your high school counselor to determine the amount of core courses that you need to complete your senior year.
- Take the ACT and/or SAT again, if necessary. The NCAA Eligibility Center will use the best scores from each section of the ACT or SAT to determine your best cumulative score.
- Continue to take college-prep courses.
- Check the courses you have taken to match your school’s list of NCAA courses.
- Review your amateurism responses and request final amateurism certification on or after April 1 (for fall enrollees) or October 1 (for spring enrollees).
- Continue to work hard to get the best grades possible.
- Graduate on time (in eight academic semesters).
COURSE DESCRIPTIONS
*A more detailed description of the class and grading system used can be located in the course syllabus.

FITNESS & WELLNESS

H0025 – FITNESS (.5)
This fitness class is designed for students who have successfully completed FITNESS 9/10. This course will encompass activities including: advanced skills development, strategies involving competitive team sports, mass games, designing an individual fitness and strength training program, dance, lifetime sports and leisure activities. This course will follow the same outline as Fitness I.

Grades are derived from authentic performance skills and objective testing.

H0041 – ADAPTED FITNESS (.5)
This course will assist students in developing skill necessary to increase their mobility, dexterity and fitness, therefore increasing their physical well-being. Students will participate in a variety of fitness and sports based activities. Special emphasis will be placed to increase student’s cardiovascular endurance, muscular strength and flexibility.

Prerequisite: Teacher recommendation

H0055 – WELLNESS I (.5)
This course will offer instruction on awareness of the human body – physically, mentally, and socially in all phases of health. Concepts such as human growth and development, nutrition, the use of alcohol, tobacco, drugs, and infectious diseases, including AIDS, are included.

H0056 - WELLNESS II (.5)
This course will continue to expand on topics covered in Wellness I.

Prerequisite: Students must successfully pass Wellness I

H0022- NUTRITION AND BODY SHAPING HN (1.0)
Using the eleven components of fitness as a basis, this course will combine nutrition and various fitness related activities for student athletes to maximize overall physical conditioning. Body shaping classes will take place in the gymnasium with an emphasis on the following: weight training, calisthenics, agilities, isometrics, plyometrics, flexibility, and additional strength and conditioning routines used for various sports. Nutrition classes will be held in the classroom and the following topics will be discussed the digestive system, digestive disorders, obesity and overweight, body types, body composition, BMI, waist line measurements, basal metabolic rate, eating disorders, terms related to nutrition, classes of nutrients, calculating calories and daily nutritional diets within maximum calorie allowance, the best way to lose or gain weight, importance of muscle tone, energy usage, food sources for vitamins and minerals, importance of hydration, percentages of daily carbohydrates, fats and proteins, guidelines for healthy eating, recommended daily allowances, negatives of processed and packaged food, effects of popular diets and diet pills and current research related to food and health (food as medicine).

Prerequisite: Open to juniors and seniors
INSTRUCTION RELATED TO AIDS

The State Board of Education has rules that require school districts to teach both the dangers of and the prevention of AIDS. In the senior high school this will be done in the Wellness class.

Teachers will excuse students who, for moral or religious reasons, oppose instruction on the topic of sexually transmitted diseases. To have a child excluded from these presentations, a parent or guardian of the student must hand-deliver or send by registered mail to the senior high school principal’s office a signed statement that they do not want their child in health class during these discussions. Then, too, should a parent wish to examine the material that will be used in AIDS lessons; one can make arrangements by calling the high school.
This freshman class blends the rigorous study of literature with the development of the rudiments of written communications. It is the fundamental course on which all higher level Language Arts courses expand upon. Much time is spent on literature responses, and analysis development, and compositions. The Literature unit consists of reading novels, short stories, poetry, and *Romeo and Juliet* by William Shakespeare. Students are taught to analyze all types of literature and apply the work to life. By the completion of the courses, students will be able to write informative pieces; with focus, effective developmental strategies, and precise stylistic techniques. Students will review the grammatical and mechanical qualities of formal writing. Some literacy concepts will be studied in written analysis. Students will produce the following types of essays: narrative, descriptive, persuasive, compare/contrast, cause/effect, and problem/solution. Students are expected to write speeches, complete daily journals and study vocabulary. This course will include at least one independent reading and critical literary research project.

**H0110 – Honors:** Students should expect a rigorous content level and pace. This course demands greater independence and responsibility. A 90% or higher in 8th grade English/Language Arts is required.

**H0111– College Preparatory:** See above

**H0112 – Applied:** This is a basic language arts course for students who feel challenged by the rigors of writing and literature. This course will focus on communication skills, as well as the basics in grammar and writing with the intent to sharpen those skills. The writing includes practice in narrative, persuasive, and informative essays. Special emphasis will be placed on reading.

**ENGLISH 10 (1.0)**

This course will cover short stories and poetry in terms of analysis of structure and meaning. A large amount of writing on both topics will be required. Students will also read a contemporary novel, *Julius Caesar* by William Shakespeare, *Crucible* by Arthur Miller and one classic novel. This course will include at least one independent reading and critical literary research project.

**H0120 – Honors:** Themes and essays on all works will be required. Literature responses, panel discussions and group writing projects will also be part of the class structure.

**H0121 – College Preparatory:** See above

**H0122 – Applied:** See above
ENGLISH 11 (1.0)

This course combines the study of various types of literature and nonfiction texts with critical thinking and writing skills. Emphasis to be placed on college-readiness. Students will complete a major outside reading and supplementary analysis with the goal of promoting a deep understanding of complex text. The course will build toward mastery of the eleventh- and twelfth-grade English/Language Arts PA Standards. Students will study novels, poetry, nonfiction and drama from a variety of time periods and authors. College-level conventions of writing, speaking, listening, and presenting will be emphasized through rigorous assessments. Various modalities of writing will be explored, including persuasion, argument, analysis/evaluation, and exposition.

H0130- Honors

H0131- College Preparatory

H0136-ENGLISH COMMUNICATIONS 11 (1.0)

This course blends composition, literacy, and analysis of literature and nonfiction texts. The course will emphasize reading and writing as cornerstones of career readiness while promoting English/Language Arts as a lifetime activity. English Communication will build the communication skills students need to enter the workforce while still embedding rigorous learning experiences that may translate well to a college setting. Students will compose single and multi-paragraph constructed response in expository, persuasive, and narrative styles. Presentation skills will be introduced and enhanced. Proper and correct conventions of writing especially those needed in the workplace will be emphasized. Students will complete career readiness activities in writing, speaking, listening and reading. Literacy texts across a variety of genres and levels will be embedded to promote analysis and critical thinking.

ENGLISH 12 (1.0)

This course will promote mastery of the eleventh-and-twelfth-grade PA standards for English/Language Arts through a synthesis of literacy, analysis, and communication instruction. This course is designed to prepare student for the realities of a college-level literature and/or composition class. Students will compose multi-paragraph constructed responses across a variety of modes including: research, analysis, evaluation, argument, persuasion, and exposition. Two major independent reading and composition projects must be completed. Major texts will include novels, poems, Shakespearean drama, and nonfiction. Student will enhance listening and speaking skills through presentations.

Prerequisite: Successful completion of either English Composition 1 or Literature & Composition 1

H00140-Honors

H0141- College Preparatory

H0148 – ENGLISH LITERATURE AND COMPOSITION-ADVANCED PLACEMENT (1.0)

AP English is open to selected college-bound seniors who have demonstrated superior understanding of and performance in all English skills. These students will be identified through testing and evaluation by the English department in conjunction with the guidance department. Advanced analytical and critical thinking and writing skills will be stressed. Classes will be taught on a college level in a seminar atmosphere and cover all genres of literature. Students completing this course should be able to qualify for college credit or placement by passing the AP exam and to compete at a high level in college courses.
Prerequisite: Students must have an 83% or better in Honors English 10 and 11 and/or department recommendation.

**H0138 - ENGLISH COMMUNICATIONS 12 (1.0)**

English Composition II builds upon the skills instructed in the pre-requisite courses. This course is designed to build and enhance reading, writing, speaking and listening skills with special emphasis on those used in the workplace; however, the rigor of learning activities will also prepare students for a trade school or college setting. Applications of the eleventh- and twelfth grade PA standards for English/Language Arts will be stressed. More rigorous, skill-based writing assignments will complement literacy instruction and mastery of the modes of college and career writing; exposition, persuasion, argument, narrative and personal. Project based approaches will be infused into instruction. Students will compose a major paper and make a formal presentation.

**POETRY, PROSE AND PUBLIC SPEAKING (0.5)**

This course will explore poetry’s many exciting genres, and students will compose and recite numerous original poems. Students will delve into public speaking and be expected to analyze, write and present narrative, persuasive and informative prose. Fiction, biographies, memoirs and other non-fiction pieces will also be required reading.

**H0152 – Honors:** This honors course may require additional reading and writing assignments.

**H0153 - College Preparatory:** See above

Prerequisite: Successful completion of English 9

**CREATIVE WRITING (0.5)**

This 90-day course offers students who are beginning to explore creative writing or who are wishing to further develop their skills an opportunity to study experienced writers and apply their own unique style. The class introduces students to the process and techniques of creative writing. Students experiment with various types of writing including poetry, fiction, historical fiction, drama, and children’s literature. Included in the course is a 2-week historical context study researching influential historical events that shaped the world and establishing those events as criteria for prose and poetry. The Holocaust will be included in this historical context study. Class readings expose students to various writing styles and provide examples of the successes and strategies of other writers. Class time is spent discussing the writer’s craft, the assigned readings, and student writing. A necessary component to this course is reading and critiquing each other’s work in a seminar forum with the eventual consideration and efforts toward publication.

**H0155 – Honors:** This Honors elective includes a more rigorous workload for a more experienced writer.

**H0156 – College Preparatory:** This college preparatory level is offered to beginning writers and will require fewer assignments and/or shorter page length requirements.

Pre-requisite: Successful completion of English 9

**LITERATURE THROUGH FILM (0.5)**

This course explores the highly complex relationship between printed literature and film. Students will engage in analytical studies of novels, short stories, plays and nonfictional texts and their respective film adaptations. Further, students will investigate films not having a textual companion in terms of applicable literary technique,
social/historical context, and commentary on our everyday lives. This course is reading and writing extensive with most class time dedicated to viewing films, discussing contents, and preparing for written responses.

**H0164- Honors:** This Honors elective will require a more rigorous workload and may require additional reading, projects and assignments.

**H0168- College Preparatory:** See above

Prerequisite: Successful completion of English 9

**NOVELS (.5)**

This course is for students who enjoy reading and analyzing novels as a literary form. Student will explore novel development in different historical and cultural contexts. Students read selected novels, discuss them, present them and learn to write critically about them. Readings include a selection of classic and contemporary novels. This course will benefit students who are college bound, especially with an arts/humanities focus.

**H0160- Honors**

**H0161- College Preparatory**

Pre-requisite: Successful completion of English 9

**SUMMER READING**

_The Language Arts Department at the High School, in conjunction with a District-wide initiative covering all grades 4-12, encourages year long literacy by maintaining a summer reading program. Through this program, students in grades 9-12 will be assigned both fiction and non fiction selections to read during the break. These books will be tested in both objective and subjective (essay) modes when students return to school. It is the goal to continue to add to our list of selections and requirements for Honors levels in the upcoming years. Grades on these assignments will count toward marking period grades in English classes. Students may check out their summer reading books from the library using their student id’s. They will return their books to the library upon return to school._

SOCIAL STUDIES - 0200

US HISTORY (1.0)

This course will survey United States History from approximately 1900 to the Present. The major topics discussed will be: *Major events in American History from 1865-1900*, *The Age of Expansion*, *Progressivism*, *World War I*, *The Twenties and Thirties*, *World War II*, *The Cold War*, *America since the Cold War*.

H0210 – Honors: The emphasis of this course goes beyond memorization of facts, and focuses on interpretation and analysis of historical data and writings.

H0211 – College Preparatory – See above

H0212 - Applied US History - Information will be delivered at a pace more desirable to student learning styles and abilities.

AMERICAN GOVERNMENT AND CIVICS (1.0)

This course will analyze the United States Constitution, the three branches of our Federal Government and their intricate interrelationships will be the major focus of this course. The major topics discussed will be: *individual rights and liberties*, *the American political system*, *the electoral process*, *the power of American public opinion*, as well as, *our foundational documents and relevant Supreme Court cases*.

H0220- Honors: The emphasis of this course goes beyond memorization of facts and focuses on interpretation and analysis of historical data and writings.

H0221- College Preparatory: A great deal of emphasis is placed upon reading, writing and oral communication. Individual research and presentations will be required throughout the course.

H0222 – Applied: - A great deal of emphasis is placed upon reading, writing and oral communication. Information will be delivered at a pace more desirable to student learning styles and abilities.

H0228 - UNITED STATES GOVERNMENT AND POLITICS- ADVANCED PLACEMENT (1.0)

This course is designed to be rigorous and demanding, with the overall goal of preparing students for the AP Exam. Students will be provided the opportunity to take an analytical perspective on United States government and politics. This course would best suit students who are intrinsically motivated and have an interest in government and politics.

ECONOMICS (1.0)

This course will place great emphasis on the basic economic problem of scarcity. Students will be expected time and again to demonstrate their efficiency in problem solving through decision-making skills. Additional topics covered in detail include: *Business Organizations*, *Economic Markets*, and *Supply and Demand*, *Labor Relations*, *International Monetary Policy*, *Comparative Economic Systems* and *Social Problems facing the United States today*
H0230 – Honors: Great emphasis will be given to the development of critical thinking skills, preparing students for college assimilation through library work, written projects, outside readings and individual research projects. A tremendous amount of reading and essay writing will be expected of students.

H0231 – College Preparatory: See Above

H0232- Applied: Information will be delivered at a pace more desirable to student learning styles and abilities.

PSYCHOLOGY (1.0)

This course will introduce students to the systematic and scientific study of the behavior and mental processes of humans. Students will be exposed to the psychological facts, principles and phenomena associated with each of the major content domains within psychology. Students will explore ethics and methods psychologists use in their science and practice. Fostering critical thinking skills will be a paramount objective in this course.

H0251 – College Preparatory: Great emphasis will be given to the development of critical thinking skills, preparing students for college assimilation through library work, written projects, outside reading and individual research projects.

H0253- Applied: The objective of this course is to acquaint the student to our rapidly changing world through some outside readings and reports. This level of study will provide basic principles of Social Psychology to better aid the student in understanding themselves as well as the world around them.

H0258 - PSYCHOLOGY – ADVANCED PLACEMENT (1.0)

This course will give students a college-level introduction to psychology. This course is designed to be rigorous and demanding, with the overall goal of preparing students for the AP Exam. This course would best suit students who are intrinsically motivated and have an interest in psychology.

CONTEMPORARY AMERICAN HISTORY (1960- Present) (1.0)

This course will take an in-depth look at the domestic and foreign policy of the United States from 1945 to the present. Major topics of domestic policy will include McCarthyism, Civil Right’s in the 1950’s and 1960’s, the war on poverty, Stagflation, Reaganomics, and current issues of today. The course will also examine social changes of each decade that defined each generation. Major topics of foreign policy to be discussed include The Cold War, U.S. involvement in Vietnam, the U.S. and the Middle East (1970-1992), and the role of the U.S. in today’s world.

H0260- Honors: Great emphasis will be given to the development of critical thinking skills, preparing students for college assimilate through library work, written projects, outside readings and individual research projects. A tremendous amount of reading and essay writing will be expected of students.

H0261- College Preparatory: See above
This course is an introduction to the basics of world geography. Students will learn how the World’s physical features as well as cultural diversities have impacted and shaped the world we live in today. Throughout the course, students will develop knowledge and skill to help them better understand the differences in physical features and climates from the regional to the international level, as well as gaining a better understanding of different cultural perspectives.

**H0273- Honors:** Great emphasis will be given to the development of critical thinking skills, preparing students for college assimilation through library work, written projects, outside readings and individual research projects.

**H0272- College Preparatory** – See above

MATHEMATICS – 0300

ALGEBRA 1A (1.0)

H0311- College Preparatory: This course lays the groundwork for the students’ studies in college preparatory mathematics. The fundamental operations are used in the study of integers, rational numbers, and simplifying and evaluating expressions. A great deal of time is devoted to solving equations and inequalities in one and two variables. Relations and functions are also studied. Polynomials will be explored through classification and operations, as well as applications of factoring. Learning will continue with radical expressions which will include the Pythagorean Theorem, simplifying radicals, and operations with radicals. The course will conclude with data analysis and probability.

H0316- Applied: This course is designed as an overview of algebraic concepts and will cover about one-half of the Algebra 1 material after starting with a Pre-Algebra review. Students will be placed into this class if they do not meet the prerequisites of college prep Algebra 1. The curriculum will start with a review of properties and operations with numbers and will then proceed into algebraic expressions. Polynomials will then be explored as well as studied through factoring. Lastly, one variable equations and inequalities will be heavily studied.

ALGEBRA 1B (1.0)

H0321- College Preparatory: Continuation of course work that was completed in Algebra 1A.

H0317- Applied: This course is designed as the continuation of Algebra 1A. It will start with a study of relations and functions. Linear equations will be written and graphed and systems of equations and inequalities will be studied in depth. The curriculum will cover radical expressions and will conclude with data analysis and probability.

H0320- ALGEBRA I HONORS (1.0)

This course is an exploration of systems of linear equations and inequalities. Polynomials and factoring are covered before going on to studying quadratic and exponential functions. This course concludes with the study of rational expressions and equations.

Prerequisite: 90% or higher in 8th grade math

ALGEBRA II (1.0)

H0330 – Honors: This is a challenging course for students who have a strong desire to focus on mathematics. This course is designed for students who have demonstrated the ability to quickly comprehend, master, and apply the concepts taught in Algebra I. After a brief review of Algebra 1 concepts, this course will continue with solving quadratics and radical equations and inequalities. Linear programming is studied as well as polynomial functions and rational expressions. The course concludes with exponential and logarithmic functions as well as analyzing conic sections. If time allows, statistics and probability and sequences and series are introduced.

H0331- College Preparatory: This course is designed for students who are planning to attend college but not necessarily majoring in the field of science or mathematics. This course includes analyzing equations and inequalities, graphing linear relations and functions, solving systems of equations and inequalities, polynomials and polynomial functions, radical expressions, equations and complex numbers, quadratic functions and inequalities, rational expressions, equations, and inequalities.
Various topics will be studied in this course. The Algebra 2 portion will start by looking at systems of equations and inequalities. Discussion will focus on the variety of ways to show and solve these systems including, but not limited to, graphs, tables, and algebraic solutions. Quadratic equations and their properties will also be discussed. The focus will be on solving, illustrating their graphs, and application to the real world. The Geometry portion will focus on the properties and attributes of geometric shapes from triangles to circles. We will also be looking at area, surface area, and volume calculations of various shapes. Finally, geometric problem solving will be addressed. Prerequisite: Completion of Algebra 1B or CP Algebra 1

GEOMETRY (1.0)

H0340 – Honors: This course provides students with a comprehensive and balanced treatment of the different aspects of geometry. Theory and mathematical applications of theorems, definitions, and postulates shall be explored with plane and three-dimensional figures. Work will focus on angle relationships, triangles, polygons, congruency, parallel lines, circles, coordinate geometry, basic trigonometry, area and volume, etc. The course deals in depth with the study and method of proof, informal and formal reasoning, symbolic and visual thinking, synthetic, coordinate, and transformational methods.

H0341 – College Preparatory: This course provides students with a comprehensive and balanced treatment of the different aspects of geometry. Theory and mathematical applications of theorems, definitions, and postulates shall be explored with plane and three-dimensional figures. Work will focus on angle relationships, triangles, polygons, congruency, parallel lines, circles, coordinate geometry, basic trigonometry, area and volume, etc. The course deals in depth with the study and method of proof, informal and formal reasoning, symbolic and visual thinking, synthetic, coordinate, and transformational methods.

H0319-FINANCIAL ALGEBRA (1.0)

This course is designed to give the students one final opportunity to learn mathematical concepts and how they apply to the real world. Algebraic topics will be revisited through the application to banking services, consumer credit, employment basics, and income taxes. Geometry topics will be further studied through automobile ownership and independent living. Statistics skills will be learned by studying discretionary expenses, the stock market, modeling a business, planning for retirement, and preparing a budget.

PRE-CALCULUS WITH TRIGONOMETRY (1.0)

H0370- Honors: This course is designed to prepare the student for a calculus course. Topics to be discussed are relations and functions, systems of equations and inequalities, the nature of graphs, polynomial and rational functions, conic sections, exponential and logarithmic functions, trigonometric functions and their graphs, and trigonometric identities and equations.

H0352-College Preparatory: This course is designed to prepare the student for a calculus course. Topics to be discussed are relations and functions, systems of equations and inequalities, the nature of graphs, polynomial and rational functions, conic sections, exponential and logarithmic functions, trigonometric functions and their graphs, and trigonometric identities and equations.
H0361-STATISTICS CP (1.0)

Many college majors require at least one course in Statistics, especially medical, mathematical, science and business related fields. All student who are planning on attending college, are encouraged to take at least one high school statistics course.

Data organization will be studied as well as a wide range of graphing techniques. Analysis of data distribution, central tendencies, and values of spread, including variation and deviation will be explored. The course will also introduce the nature of classic probability and the calculation of its values. Lastly, inferential statistics will be introduced through course intervals and hypothesis testing.

STATISTICS (1.0)

Through the use of technology, projects and laboratories, cooperative group problem-solving, and writing, students will be introduced to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. The curriculum, designed by the College Board, will expose students to four broad conceptual themes: Exploring Data, Sampling and Experimentation, Anticipating Patterns, and Statistical Inference. Throughout each class, students will dialogue with peers and instructor, both verbally and in writing, using appropriate statistical terminology, vocabulary, and language. Students will have the opportunity to take the AP Statistics exam at the end of the course in order to potentially receive college credit for the course.

H0360: Honors

H0364: Advanced Placement

CALCULUS (1.0)

This course is designed for students who plan to pursue a scientific or math-oriented career. Students who select this course should have a thorough knowledge of Algebra, Plane Geometry, and Trigonometry. The material to be presented follows the recommendations of the Committee on Mathematics of the Advanced Placement Program. Calculus is a study of limits, continuity, differentiation, applications of derivatives, integration, and application of integration techniques. The course of study is designed to prepare students for a collegiate Calculus course and/or the Advanced Placement Calculus AB exam. College-level performance and work habits are expected. Students will have the opportunity to take the AP Calculus exam at the end of the course in order to potentially receive college credit for the course.

H0380: Honors

H0384: Advanced Placement

H0385 – AP CALCULUS BC (1.0)

AP Calculus BC is an extension of AP Calculus AB. It is intended for those students who after completing AP Calculus AB course want to reinforce their knowledge of topics covered and extend their knowledge into more Calculus topics. There are essentially three parts of the course: topics from AP Calculus AB, new topics in AP Calculus BC and topics from a traditional second semester college Calculus class. The general topics covered include but are not limited to limits, derivatives, integrals, and polynomial approximations and series. The students should have a graphing calculator for the course, preferably a TI-89. A summer packet must be completed.
Prerequisite: AP Calculus AB

**Applied Algebra 1A**

**Applied Algebra 1B**

**Applied Algebra 2 and Geometry**

**Applied Financial Algebra H0319**

**College Preparatory**

**Algebra IA CP & Algebra 1B CP**

**Algebra II CP**

**Geometry CP**

**Pre-Calculus with Trigonometry CP H0352**

**Statistics CP H0361**

**Honors**

**Algebra I HN**

**Geometry HN**

**Pre-Calculus with Trigonometry HN**

**Calculus HN with AP AB Option**

**Statistics HN with AP Option**

**Calculus AP BC**
This course provides students with a greater understanding of the fundamentals of geology, meteorology, astronomy, and oceanography concerning Earth Science. For ecology, a combining of ideas from natural science, social sciences, and ethics to present an idea of how nature works, and how things are interconnected. It examines how the environment is being used and abused and what individuals can do to protect and improve it. Some topics include ecology, watersheds, wetlands, natural resources, agriculture, and the impact of humans on the environment.

H0411 - College Preparatory

H0412 - Applied

H0400-STEAM FOR THE 21st CENTURY (1.0)

This course will provide an interdisciplinary approach to integrating STEAM into the skills students need to be successful in the 21st century. This course will involve the participation of problem-based and project-based learning activities, mathematics and science inquired learning tasks, and using technology to gain and display information. Student will practice backwards design to develop their own STEAM learning activity.

BIOLOGY/LAB (1.0)

This course deals primarily with the fundamental properties of living things, life processes, classification, growth and reproduction, heredity, and natural selection. Emphasis is placed upon the modern energy relationships, organic chemistry, and genetics. Laboratory work is an integral part of the course where applicable.

H0420 – Honors: This is an accelerated class for students possibly interested in a career in the science field.

H0421 – College Preparatory: This course is designed for students who do not desire an accelerated program in biology. It covers the basic principles of life: chemical and structural, energy relationships, classification, heredity, and natural selection. Class discussion and laboratory investigation will be implemented.

H0427-Modern Biology: This course is designed to be interesting, understandable, and practical. It will deal with the most difficult concepts easily through the use of analogies and examples familiar to students. In a unified manner, the course will include the study of cells, reproduction, energy relationships, genetics and natural selection

H0419-BIOLOGY/LAB ADVANCED PLACEMENT (1.0)

AP Biology is a yearlong course with integrated laboratory experiments. The course is equivalent to a freshman-level collegiate general biology course. The course requires students to apply independent thinking and analytical skills to increase their knowledge and understanding of biological concepts as they relate to the AP Biology Curriculum Framework. The course will utilize the concepts of life processes, classification, growth and reproduction, bioenergetics, organic chemistry, genetics and evolution as they relate to the four big ideas:
**Big idea 1:** The process of evolution drives the diversity and unity of life.

**Big idea 2:** Biological systems utilize free energy and molecular building blocks to grow, to reproduce, and to maintain dynamic homeostasis.

**Big idea 3:** Living systems store, retrieve, transmit, and respond to information essential to life processes.

**Big idea 4:** Biological systems interact, and these systems and their interactions possess complex properties.

As a Biology AP student, you must be committed to a year of focused study and you will be expected to take the AP exam in May.

Prerequisite: Completion of Honors Biology I with an 83% or better OR Completion of College Preparatory Biology I with an 88% or better AND completion of College Preparatory Chemistry I or higher level with an 88% or better.

**H0424 - HONORS BIOLOGY II/LAB (1.0)**

This course is an extension of Biology 00420. It is recommended for students pursuing biological sciences at the post-secondary level. This course will deal with the relationships man has with organisms of the six kingdoms. Research topics will include, but not be limited to: the history of medicine, bacteria/viruses, protists, fungi, the evolution of organs and systems, and plants. There will be heavy emphasis on man’s dependence on the plant kingdom for life and survival.

**CHEMISTRY/LAB (1.0)**

This course provides a firm foundation in chemical concepts and principles using a strong mathematical approach to the study of chemistry and a high degree of student involvement in the laboratory. Emphasis is placed on utilization of the students’ problem-solving and critical thinking skills.

**H0440 - Honors:** Prerequisite: Successful completion of Algebra II and Biology meeting the minimum prerequisite requirement.

**H0441 – College Preparatory:** This is an introductory chemistry course designed to help students understand how chemical principles and concepts are developed from experimental observations and data, and how these principles can be used to explain phenomena in the laboratory as well as in daily life. Emphasis is placed on the development of problem-solving skills and critical thinking skills.

Prerequisite: 75% or better in Algebra 1B College Preparatory (H0321) or Algebra II College Preparatory (H0331) which ever math was most recent and 75% or better in Biology (H0421)

**H0447-CHEMISTRY/LAB ADVANCED PLACEMENT (1.0)**

This course is a heavily oriented laboratory design used to prepare students for the AP Chemistry Exam. It is equivalent to a first year college chemistry course. The content includes advanced concepts in atomic structure, chemical bonding, molecular structure, equilibrium, kinetics, thermodynamics, electrochemistry, and analytical techniques. Class size will be limited based on student achievement. Students must complete Chemistry and meet honors/college preparatory pre-requisites in order to be placed in the course.
H0446 – MODERN CHEMISTRY/LAB (1.0)

This lab based course is designed to introduce basic chemistry concepts and principles that are evident in everyday life. The topics that will be emphasized are the scientific notation, significant figures, physical and chemical changes, atomic structure, the periodic table and basic chemical nomenclature.

PHYSICS/LAB (1.0)

This laboratory oriented course provides coverage on concepts on physics, the science of matter and energy.

H0450 – Honors: Stress is placed on problem solving, using Algebra, Trigonometry, and many aspects of Geometry, in order to help the college-bound student develop good thought processes. College level problems and materials are used whenever student progress in concept mastery permits.

Prerequisite: 83% or higher in Honors Geometry or 88% in College Preparatory Geometry and 83% or better in Honors Chemistry and/or departmental recommendation

H0451 – College Preparatory: Laboratory investigations provide opportunities to discover and apply basic concepts to situations of varying practicality and complexity. The mathematics involved requires mastery of Algebra and Geometry. Problem solving skills are emphasized. Students develop skills in the application of the scientific method and measurement to common situations.

Prerequisite: 75% in college preparatory Geometry and/or teacher recommendation

H0458- PHYSICS 1 ADVANCED PLACEMENT/LAB (1.0)

AP Physics 1 is an algebra-based, introductory college-level physics course. Students cultivate their understanding of Physics through inquiry based investigations as they explore these topics: kinematics; dynamics; circular motion and gravitation, energy; momentum; simple harmonic motion; torque and rotational motion; electric charge and electric force; DC circuits; and mechanical waves and sound.

Prerequisite: 83% or better in Honors Physics I or teacher recommendation

H0456 – PHYSICS AND TECHNOLOGY/LAB (1.0)

Physics is the study of matter and energy. This 90-day lab based course is designed to be practical in nature. Topics include measurement, motion, forces, energy and simple machines. Problem solving skills are emphasized. Students will develop skills in the application of the scientific method and measurement to common situations.

Prerequisite: Passing grades in Biology

HUMAN ANATOMY AND PHYSIOLOGY/LAB (1.0)
H0460-Honors-This course is designed to give the student a detailed study of the human body at the tissue, organ and organ systems levels. It covers the structure and function as well as the interrelationships among organ systems. The following organ systems will be covered: skeletal, muscular, integumentary, digestive, cardiovascular, blood, urinary, endocrine, respiratory and reproduction. The last quarter of the spring semester is spent dissecting a cat to observe the organ systems. The curriculum is designed to have weekly tests and quizzes, daily homework assignments, and lab work with a partner.

H0461 - College Preparatory- The course includes the study of body organs and systems and their functions: cellular physiology, blood circulation, muscle action, skeleton, respiration, elimination, hormones, digestion, and body covering. Physiological experiments are included when appropriate. It is recommended for students interested in post-secondary study in the biological sciences, allied medical fields, and physical education.

ENVIRONMENTAL SCIENCE/LAB (1.0)

This course includes both classroom and outdoor lab scenarios to help students become aware of and concerned about the total environment and have the knowledge and skills to work toward responsible solutions. Specifically, the class will study Pennsylvania's fauna and flora, watersheds, ecosystems, agriculture, forests, and other natural resources that will allow them to understand how their lives revolve around their use of the natural world.

H0470- Honors: This is an accelerated class for those who may be entering post-secondary science fields.

H0471- College Preparatory: See above

WORLD LANGUAGES - 0500

NOTE: A student should have a strong foundation in English grammar before electing any foreign language course. All classes will attempt to use the foreign language being studied as much as possible during class lessons.

H0511 – COLLEGE PREPARATORY SPANISH I (1.0)

This course is an introduction to the Spanish language through conversation, reading, writing, and translation. Emphasis is placed on grammatical construction and vocabulary. Aspects of Spanish culture and its influence are introduced. The use of the Spanish language in our country is explored.

Prerequisite: 80% or better in 8th grade English or high school English during prior year and/or departmental recommendation and instructor's approval. NOTE: If you don't have a strong foundation in English grammar, you will probably experience difficulty in this course.

H0521 – COLLEGE PREPARATORY SPANISH II (1.0)

The course includes a review of Spanish I such as present and preterit tenses, as well as grammatical constructions. Vocabulary and idioms are extensive. Upon completion of this course the student should have adequate proficiency to express himself/herself in many oral and written situations.

Prerequisite: 80% in Spanish I and/or department recommendation

H0530 – HONORS SPANISH III (1.0)

This course reviews and expands on Spanish grammar. The remaining indicative tenses are stressed. Emphasis is placed on oral/aural skills and written compositions. Cultural and literary readings are used to improve reading ability as well as help students acquire an appreciation of the Hispanic culture.

Prerequisite: 88% in Spanish II

H0541- SPANISH LANGUAGE AND CULTURE ADVANCED PLACEMENT

The Spanish Language and Culture AP course emphasizes communication (understanding and being understood by others) by applying the interpersonal, interpretive, ad presentational modes of communication in real-life situations. This includes vocabulary usage, language control, communication strategies, and cultural awareness. The Spanish Language and Culture AP course strives not to overemphasize grammatical accuracy at the expense of communication. To best facilitate the study of language and culture, the course is taught almost exclusively in Spanish. The Spanish Language and Culture AP course engages students in an exploration of culture in both contemporary and historical contexts. The course develops student’s awareness and appreciation of cultural products (e.g. tools, books, music, laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions).

Prerequisite: Spanish I, II and III

*Class is not being offered for the 2021-2022 school year
BUSINESS EDUCATION – 0600

H0601 – INTRODUCTION TO BUSINESS (1.0)

Strongly recommended for students who intend to pursue a career in business, however should be taken by all students as a general knowledge course. Special emphasis will be placed on the following: the development of all consumer skills – personal and business related; choosing a career; credit; banking; insurance; federal income tax returns; free enterprise, and your role in the free enterprise system.

H0618 - COMPUTER APPLICATIONS & CAREER READINESS (1.0)

Students will learn skills needed to succeed in high school and the workplace. It is designed to expose students to principles, concepts, and procedures relating to: digital citizenship; soft skills; career exploration & acquisition; and computer applications. Students will enhance their word processing skills with the creation of various documents including résumés. Students will explore various career pathways using a web-based program. Students will also gain a deeper understanding of principles and concepts related to personal finance and budgeting using spreadsheet applications. They will also develop effective presentation skills while using presentation software. This course will prepare students for higher learning as well as for today’s workplace.

H0622 - COMPUTER PROGRAMMING CP (1.0)

This course provides entry-level training on computer programming languages, as well as relevant and current computer science topics. This includes programming algorithms, interface development, telecommunications techniques, and exposure to topics being addressed by professionals in the field.

In addition, this class will explore unique Python data structures such as tuples and dictionaries, and how to create Python programs with graphic elements that range from simple circles and squares to graphical user interface (GUI) objects like buttons and labels. While Python contains the same basic structures as other languages, it also offers unique functionality that makes your life as a programmer easier. Whether you are interested in writing simple scripts, full programs, or graphical user interfaces, this course will give you tools you need to use Python with skill and confidence.

Prerequisite: Computer Apps. & Career Readiness

H0631 – HONORS WEB PAGE DESIGN (1.0)

This course provides entry-level to advanced training in the creation and design of web sites. Instruction includes working with web authoring software, the creation of HTML files and graphics for the Web, Web site development and management. Instruction includes the creation of HTML files using Adobe Dreamweaver, Photoshop, Edge Animate, and Flash. Topics include customer expectations, advanced markup language, multimedia technologies, usability and accessibility practices and techniques for the evaluation of web design. Upon completion students should be able to employ advanced design techniques to create high impact and
highly functional web pages. Equipment will include Apple computers, digital cameras, scanners, printers and current software for Web page design.

Prerequisite: Computer Applications & Career Readiness and Computer Programming

H0651 – ACCOUNTING I (1.0)

Accounting as it relates to careers as well as personal applications to one’s own financial practices. This goal, mentioned above, will be accomplished through the knowledge of accounting terminology; the understanding of accounting concepts, principles, and practices; and the practical application of accounting procedures. The knowledge and skills acquired in Accounting can be used to:

1. Pursue further development of your accounting skills by taking Accounting II
2. Secure an entry-level position in the accounting field.

H0662- ACCOUNTING II (1.0)

This advanced accounting course is designed for students who have successfully completed Accounting I. Advanced theories of accounting are introduced which include payroll, adjusting/closing entries for a partnership, departmental accounting, preparation of financial statements, discounts, returns and allowances, and bad debts. Accounting theory pertaining to a corporation is introduced. A business simulation using the accounting cycle for a partnership is completed. Generally accepted accounting concepts are highlighted throughout the course. Careers in accounting are explored as well as computerized accounting.

Pre-requisite: Accounting 1

H0653- HONORS ACCOUNTING III (1.0)

This course is designed for students planning a college major in accounting, business administration, marketing, finance, or management. Student will learn how to record analyze, interpret, and report financial information for corporation. Topics include: accruals, deferrals, depreciation, and bad debts. Computerized accounting problems and a simulation will be incorporated throughout the course.

Pre-requisite: Accounting I & II

H0655 - PERSONAL FINANCE (1.0)

This course is designed to provide students with the necessary skills to perform well as a consumer in day to day affairs that present themselves in a business orientate system such as ours. Topics included: goal setting, financial planning, ways to maximize earning potential, financial resources, wise use of credit, debt, checking accounts and banking services, financial security, credit management, resource and management, budgets, insurance, taxes, housing, investments and retirement.

H0661 – BUSINESS LAW (1.0)

This course is designed to provide an understanding of the origin of law, the basic principles of law that affect consumers, workers, and citizens in their daily relations with one another. In addition, the student will understand his/her legal rights, privileges, and responsibilities. Topics to be covered include: the US legal system, criminal law, civil law, contract law, juvenile justice, sales contracts, product liability, and consumer protection.
H0681-SPORTS AND ENTERTAINMENT MARKETING (1.0)

This course is designed to explore the intriguing world of sports and entertainment from the perspective of marketing and management principles used by successful businesses. Topics covered will include: college and amateur sports, professional sports, marketing the entertainment industry, recreational marketing, public images, marketing plans, leadership, finance, product management, human resources, legal and ethical issues, and customer relations.
FINE ARTS – 0700

H0708-HISTORY OF MODERN MUSIC (.5)

The students will explore the development of Rock and Roll, Country, Rap and Pop music from its early years to modern artists of today. Through multi-media material, research projects and student centered discussion the class will learn how music represented culture throughout the decades. The course will help students become more knowledgeable listeners and music consumers as well as relate their generation with previous eras.

H0710 – MUSIC THEORY I (.5)

Students become familiar with musical terminology and development of note reading skills on treble and bass staffs, rhythm identification, scale construction and cadence. Performing ability on an instrument or vocal music reading ability

Prerequisites: Completion of Middle School Elective Music

H0712 – MUSIC THEORY II (.5)

Students become familiar with music terminology, learn how to write musical manuscripts, listen to and construct diatonic intervals, listen to and construct all of the major and relative minor scale forms, listen to and construct the primary and secondary triads. Aural skills will be developed by singing with syllables and in the use of rhythmic, melodic, and harmonic dictation. Part writing will be introduced and applied in writing exercises.

Prerequisite: Music Theory I or students with active involvement in band, chorus, or the private study of an instrument may fulfill the requirement with knowledge and skill in reading music.

BAND/CHOIR

Students wishing to schedule both Choir and Band should select this course. Students will rehearse with each ensemble three periods per cycle, resulting in six periods per cycle of applied music. One credit will be awarded for both band and choir for a total of two (2) credit hours. Material will be the same as outlined in Band and Choir.

H0750 – Honors Band Semester One (.5 credit)
H0751 – Honors Band Semester Two (.5 credit)
H0752 – College Preparatory Band Semester One (.5 credit)
H0753 – College Preparatory Band Semester Two (.5 credit)
H0754 – Honors Choir Semester One (.5 credit)
H0755 – Honors Choir Semester Two (.5 credit)
H0756 – College Preparatory Choir Semester One (.5 credit)
H0757 – College Preparatory Choir Semester Two (.5 credit)

This course is taught through a practiced application of basic principles laid down in the middle school plus the
development of these skills to a higher level of understanding and achievement. This course will require that all students actively attend all marching band and concert band activities. Marching band will begin with summer rehearsals and continue until the end of football season. Three hours of after-school rehearsals during September, October, and November is also required. The remainder of the school term will be spent in the study of instrumental technique and concert band performance. Students may be assigned one lesson per week to improve their individual abilities and techniques on their respective instrument. Emphasis will be placed on reading, breathing technique, and proper performance practices. Performances may include all football games, marching festivals, parades, concerts, PMEA adjudication and possibly day or overnight field trips as scheduled in advance.

Prerequisite: Recommendation from the middle school band director.

H0760 – Honors Band 1 Semester One: Students will be graded at a higher proficiency level and performance level. All students must audition for PMEA District Band in the fall semester and perform in at least one recital during the spring semester. Students will be required to complete an in-depth research paper and assist with concert preparations. Seniors may also be expected to perform in a jury. This course is open to 11th and 12th grade students.

H0761 – Honors Band 1 Semester Two: Expectations are listed for H0760

H0762 – College Preparatory Band 1 Semester One

H0763 – College Preparatory Band 1 Semester Two

CHOIR (1.0)

The choir rehearses for annual holiday and spring programs. During class the student is provided an opportunity to develop their singing voice and to enhance the knowledge of music as applied to choral singing. Guidance is given in the basic techniques of vocal production. The choir will sing music that embraces different genres and cultures, providing the student with a variety of ensemble singing. Instruction and rehearsal is given in the classroom and at a few required after-school rehearsals. Performances may include concerts, music festivals, community concerts, caroling, PMEA adjudication and possibly day or overnight performance trips as scheduled in advance.

Prerequisites: Recommendation from middle school choral director, or the ability to match tones and/or music reading ability.

H0764 – Honors Choir 1 Semester One: In addition to singing in the Choir and meeting all of the requirements of the Choir course, students who wish to receive Honors credit must also:

1. Be in grades 11 & 12
2. Audition for and be accepted into Music Express Sr. and perform at all additional performances. Rehearsals take place after school and in the evening at the discretion of the director.
3. Audition for PMEA District Chorus
4. Participate and assist in all school concerts and make a visible effort to audition for solos.
5. Students will be required to complete an in-depth research paper.

H0765 – Honors Choir 1 Semester Two: Same expectations as listed in H0764

H0766 – College Preparatory Choir 1 Semester One

H0767- College Preparatory Choir 1 Semester Two
ART

H0771 - VISUAL ART & DESIGN (.5)

Visual Art is an introductory art class and an important building block for all other art classes. Students will be introduced to drawing and painting techniques as well as an understanding of the application of the elements of art and how they relate to their artwork.

H0773-CRAFT/THREE DIMENSIONAL ART (.5)

This is a sampling course designed for the student who does not wish to concentrate on a specific medium, but to experiment with a wide variety of traditional craft methods. Centering on three-dimensional design, areas of sampling may include mosaics, assemblages, basketry, weaving, sculpture etc. Students may be required to purchase supplies depending on project.

H0781 – DRAWING & PAINTING I (1.0)

This Art course is an extension of the introductory Visual Art course. This course will offer an in-depth look at drawing and painting techniques and subject matter. Students will explore new materials and techniques to help build their skill set.

Prerequisite: Visual Art & Design

H0791 – CERAMICS I (.5)

Ceramics 1 is a foundation course focusing on the structural techniques of hand-building, coiling, slab, pinch and integrated with the sculptural technique of modeling. Students can expect to complete pieces utilizing these techniques centering on functional as well as non-functional concepts.

H0792 – CERAMICS II (1.0)

Students will continue to build traditional ceramic skills through assigned projects but with a focus on advanced surface treatment, decorative and glazing techniques. Students will be introduced to throwing on the wheel as an advanced skill.

Prerequisites: Ceramics & Sculpture I.

H0799 – HONORS ART SEMINAR (Juniors and Seniors) (1.0)

This course is intended for students interested in a serious study of Art.

Students will learn new techniques in observation to create drawings from life. Pictorial references will also be used to create artistic style. Through assigned projects, students will create realistic drawings and paintings and experiment with abstraction in order to find their own artistic style. Sketch book assignments will be given to
help build drawing skills and development of artistic ideas.

Prerequisite: Successful completion of Visual Art & Drawing and Painting 1 and teacher recommendation

H0798-HONORS ART SEMINAR II (Seniors) (1.0)

This is a continuation of Art Seminar 1. Students will continue to build their observational and pictorial drawing and painting skills by choosing advanced subject matter for assigned projects. Students, who are preparing a portfolio in order to pursue art studies after graduation, will benefit from this course and its focus on advanced studio work. Sketch book assignments will be intergraded to help develop drawing skills and development of artistic ideas.

Prerequisite: Honors Art Seminar I & teacher recommendation

H0921 – PHOTOGRAPHY (.5)

This course will introduce the history, basic skills, and conceptual elements of photography. Both traditional and digital tools and methods from 35mm cameras to modern devices will be utilized. Students will be exposed to the hardware and software necessary for each step of the image making process.

H0922-PHOTOGRAPHY II (1.0)

This class is a full semester class for the serious photographer who has already taken a Photography I course. This class will further explore the aesthetic and technical theories and techniques of digital and 35mm photography. Photography II will also include the use of image editing software. Various camera settings will be learned to offer greater creative and technical control. Students will also examine images critically through in class critiques.

Prerequisite: Photography & Graphics I

H0923-ADVANCED PHOTO STUDIO (1.0)

Advanced Photo Studio is a continuation of Photography II and is a course designed to build a portfolio for any student who wishes to continue their education in photography or the arts. Students will become familiar with portrait and studio lighting and set up as well as further explore editing software.

Pre-requisite: Successful completion of Photography and Graphics II and teacher recommendation.

H0925- VISUAL COMMUNICATIONS (1.0)

Visual communications is a project based course that will allow students to develop their career and communications skills in graphic design, illustration, print and digital media production. Students will become skilled in working with hands-on creations as well as various software programs to create logos, posters, flyers and other design applications.

Prerequisite: Successful completion of Visual Arts

H0774-ILLUSTRATIONS & ANIMATIONS (1.0)
Illustrations and Animations is a project based course designed for students who have an interest in exploring the art of illustration. Students will be introduced to a variety of tools and techniques for illustrative graphic presentation of design ideas and products. Students will also be able to explore Adobe software programs to enhance and create illustrations.

Prerequisite: Visual Arts

FAMILY CONSUMER SCIENCE-0800

H0820- CREATIVE FOODS (.5)

This course is designed as a beginner’s course to introduce students to working in the kitchen and cooking basics. Topics covered will include: Equipping the kitchen, meal planning, food safety and storage, preparation techniques, recipe equivalents and cooking methods. Information found on the food guide pyramid along with the dietary guidelines for Americans will be investigated. Current issues in nutrition will be explored. Students will also discover how nutritional needs change throughout the lifespan.

Course is not offered for the 2021-2022 school year.

H0851 - INDEPENDENT LIVING (.5)

This course is designed to prepare students to live independently. Students will be given the opportunity to research career and post academic options available to them after high school. They will learn to use the decision making process while managing their relationships, financial, nutritional, and other consumer needs. In addition, students will explore creating a budget, vehicle financing, insurance needs, renting, buying and furnishing a home.

H0832- CHILD DEVELOPMENT (.5)

In this course, students will explore the various theories on child rearing and child development. Students will also study some of the pioneers of teaching and their methods and compare them to child rearing in today's world. Students will also learn basic child care needs and gain an understanding of what levels and time frame that children develop.
TECHNOLOGY EDUCATION – 0900

TECHNOLOGY

NOTE: The following technology education courses will be a benefit to both the hands-on learner and to the perspective engineer. In cases where students are given the opportunity to make special projects beyond the general curriculum, which generally use “extra materials”; those students will be financially responsible for the supplies they personally used.

H0901 – CONSTRUCTION TECHNOLOGY I (1.0)

This course offers the beginning student instruction and demonstration in construction using industrial materials. The student will become acquainted with simple design, craftsmanship and various fasteners used in construction. Students will recognize proper use and safety procedures of tools and machines, correct sanding techniques and finishing of industrial materials. The student will gain knowledge of the relationship between science and math through practical applications.

Prerequisite: All to all students

H0902 – CONSTRUCTION TECHNOLOGY II (1.0)

This course gives the student a broader knowledge of construction skills. The students will experience different design techniques for various styles of construction. The students will begin to apply computer science with some of the machines being used in construction. Emphasis will be placed on the use of machine attachments, jigs and fixtures as used in mass production techniques similar to industry. Students will develop an appreciation of quality and craftsmanship in useful work applications.

Prerequisite: Construction Technology I

H0903 - CONSTRUCTION TECHNOLOGY III (1.0)

This course offers the student the opportunity to independently explore specialized areas of construction using problem solving and research techniques. Emphasis will be placed on the use of machine attachments, jigs, and fixtures as used in mass production techniques similar to industry. Students will enhance their knowledge of computer controlled machines in this class thus becoming better prepared to further their education in construction or go into the work force.

Prerequisite: Construction Technology I & II

H0904 – CONSTRUCTION TECHNOLOGY IV (1.0)

This course offers the student the opportunity to expand upon the skills and knowledge obtained in the previous Construction Technology classes. This course offers students to independently explore specialized areas of woodworking. Emphasis will be placed on the use of the machine attachments, jigs, and fixtures as used in mass production techniques similar to industry. Assessments in the course will be including the design, development, and creation of products from initial idea to completion. Students will enhance their knowledge of computer
controlled machines in this class thus becoming better prepared to further their education in construction or go into the work force.

Prerequisite: Construction Technology I, II & III

**H0911- MANUFACTURING TECHNOLOGY I (1.0)**

Manufacturing Technology I is designed to give the students insight to the field of metal working. Major emphasis of the course includes safely operating metalworking hand tools and machinery. Students are required to complete project(s) in tow of six metalworking areas such as machining, forging, welding, sheet metal, casting, and jewelry making. Problem-solving skills will be enhanced by hands-on learning throughout the semester.

Prerequisite: Open to all students

**H0912 - MANUFACTURING TECHNOLOGY II (1.0)**

Manufacturing Technology II begins where Manufacturing Technology I left off. Students will be introduced to more demanding and complicated procedures. Topics such as MIG welding, advanced machining techniques, cold and hot forging, metal casting, blueprint reading and drawing will be covered extensively. The prospective student will be required to complete various assignments outside of the classroom and lab environment.

Prerequisite: Manufacturing Technology I

**H0913 - MANUFACTURING TECHNOLOGY III (1.0)**

This course is designed to incorporate and implement all of the skills learned in the previous two courses. Each student will be encouraged to design, plan, and construct their own metal project. Advanced concepts will also be covered such as TIG welding. All equipment and facilities will be available with individualized instruction.

Prerequisite: Manufacturing Technology I & II

**H0914- MANUFACTURING TECHNOLOGY IV (1.0)**

A fourth level metals course designed to expand upon the skills and knowledge obtained in the previous Manufacturing Technology classes. This course offers students to independently explore specialized areas in metal working. Students can choose to focus on welding, machining, casting, forging, sheet metal, and/or art metal. With an emphasis on advanced techniques, jigs, fixtures, tooling and pattern making, CAD/CAM/CNC will also be discussed including the design, development, and creation of products from initial idea to completion.

Prerequisite: Manufacturing Technology I, II, III

**H0951 – ENGINEERING GRAPHICS I (1.0)**

Introduction to Engineering Graphics is an introduction to the field of drafting. In this course, students will learn basic skills in sketching, lettering, and orthographic and isometric projections on paper and CAD software.
This course will also explore various careers and applications of drafting in everyday life. For students considering a career in drawing, engineering or any trades, this course will be very beneficial.

Prerequisite: Open to all students.

H0952 – ENGINEERING GRAPHICS II (1.0)

This second-level drafting course is designed to expand upon the knowledge gained in previous course. Students will learn more advanced techniques such as auxiliary views, true length lines, and the spatial location of a line. CAD software will also be explored in this class with detail. This demanding course will challenge the skills of the students and prepare them for post secondary education in fields including, but not limited to, CAD, engineering, construction, and technology.

H0981 – INTRODUCTION TO TECHNOLOGY & ENGINEERING (1.0)

This course is designed to give students insight to the various fields encompassed by technology and engineering. Special emphasis will be placed on the following: technological systems, technological processes, production tools, the problem solving and design process, manufacturing products, using technology to communicate, energy-conversion systems, operating technological enterprises and the relationship between humans and technology.
